Definitions

Term	Definition
Reading List	A Reading List is a list of books read as part of a continuous learning process.
Topic	A Topic is a category label that best summarizes a book's content.
KBSize	This metric is the total word count of the notes taken while reading a given book.
A4Sheets	This metric represents KBSize converted to the corresponding amount of A4 sheets (500 words ≅ 1 A4 sheet). The higher the amount, the better the book.
AB%	For a given publisher, AB% is calculated as the total number of A4Sheets of notes taken across all books read from that publisher. The higher is AB%, the better the publisher.
Underlines	Underlines are sentences that express a fundamental concept that can be understood as-is.
U%	For a given book, U% is calculated as the number of Underlines in that book compared with the average number of Underlines across the entire reading list. The higher the U%, the better the book.
Reading Status	A Reading Status is a string that reports, at a specified time grain, the number of books read and the corresponding total pages.
Trend (↕)	A trend is a gamification metric that indicates whether a measure (e.g., total books read) has increased or decreased over time.
